Lawrence Livermore
National Laboratory

Mission

The Center for Global Security Research (CGSR) was founded in 1992 to serve as a bridge between the technical and policy communities. It seeks to catalyze broader national and international thinking about the requirements of effective deterrence, assurance, and strategic ability in an ever-evolving security environment.

Approach

CGSR convenes workshops, sponsors lectures, conducts research and analysis, and generates publications. Its work is nonpartisan, multidisciplinary, and unclassified. Its small core permanent staff leads these activities in partnership with project participants from the laboratory technical staff and is supported by a large cast of temporary research assistants.

Thrust Areas

- Major power rivalry and the changing dynamics of deterrence
- New regional challenges and challengers
- Integrated all-domain strategic deterrence
- Future of long-term cooperative strategies to reduce strategic dangers
- Future of long-term competitive strategies
